DETAILED ACTION

Response to Remarks

Applicants' arguments, filed on 6/9/08, have been approved and entered. They have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 287, 290, 292, 293, are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al. (JACS, a983, Vol. 105, pp6638).

Smith et al. discloses a nonmetallic porphyrin comprising an aldehyde moiety as a reactive group attached to the non-pyrrole position. (see page 6639, structure 36). Said porphyrin comprises alkyl group attached to the pyrrole ring, which can comprise further a polar group. It is well known in the art that an aldehyde is capable of forming a carbon-carbon linkage.

Claims 291, 294, 295 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 296, 299-303 are allowed.
